## DETAILED ACTION

### *Election/Restrictions*

Claims 1–46 are generic to the following disclosed patentably distinct species: the species within the genus of a compound which binds to a receptor for glucagon-like peptide-1, the genus of an incretin, the genus of a glucagon-like peptide-1 (GLP-1), the genus of an exendin, or an agonist, an analog (preferably an agonist analog), a derivative, or a variant of any of aforementioned genera, and biologically active fragments thereof. The species are independent or distinct because different proteins and/or compounds are structurally distinct chemical compounds requiring separate searches and are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each protein and/or compound is presumed to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election. *Applicant is further advised that an election of “SEQ ID NO: 1” [GLP-1(1-37)], an election of “SEQ ID NO:12” [exendin-3], or an election of “SEQ ID NO: 14” [exendin-4], for example, would be considered a proper species election, whereas an election of “a compound which binds to a receptor for glucagon-like peptide-1”, an election of “an incretin”, an election of “a glucagon-*

*like peptide-1 (GLP-1)", or an election of "an exendin", for example, would NOT be considered a proper species election.*

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1647

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
